Information notes

1. All emergencies have to be coordinated through the personalized telephone number of **Línea Directa**.

A “vital emergency” is considered to be an unexpected and serious medical situation that affects a pet and requires immediate attention from a veterinarian. This situation must be resolved immediately, and cannot wait to be treated during a veterinary consultation with an appointment because it puts the animal's life in critical danger.”

2. All services performed due to an emergency will have a **25% supplement** on the base tariff.
3. The treatment prices **do not include**: fluids, medications, prostheses and orthoses, as well as pins, meshes, plates, cerclages and resuscitation of newborns if necessary.
4. In autonomous communities where vaccination is mandatory, the costs derived from bureaucracy will be charged at the private price of the veterinary clinic where the insured has attended.
5. It is possible that not all the veterinary practices in our network perform all the treatments included in this list. **The customer must check for availability.**
6. The “specialty consultation” applies only to those families listed on the tariffs.
7. “Daytime hospitalization” applies according to the schedule of each center.
8. **Dewormers with** different compositions than those included are not covered. The provision of the dewormer will always be linked to an in-person appointment.
9. The rest of acts not included in this scale will apply the private rate of the veterinary clinic.
